Projects

[CampusHub App](#) - Hackathon-winning official campus communication app for IIE Varsity College

[Focused Network App](#) - Full-stack mobile platform for a South African NGO, Focused Network

[SA-Digital Portal](#) - Digital identity & document verification platform built for SA citizens

[Iphunga-fragrances](#) - Full-stack e-commerce platform with stripe integrated online payments

[1947 On Vilakazi Street](#) - Restaurant platform with online booking and social media integration

[Sales Dashboard App](#) - Salesforce Lightning application using LWC, Apex, Reports, and Dashboards for real-time sales analytics

[Visualforce Account Opportunity Interface](#) - Salesforce interface for account and opportunity

EDUCATION

Bachelor of Computer & Information Science in Application Development (Distinction) Mar '22 - Dec '24

Varsity College Waterfall (Emeris) | Midrand, SA

Higher Certificate in Information Technology and Support Services (Distinction) Mar '21 - Dec '21

Varsity College Waterfall (Emeris) | Midrand, SA

WORK EXPERIENCE

Systems Integration Specialist Jun '25 - Present

KÁRITA Education Services | Florida, US · Remote

- Led development of a full-stack administrative platform, replacing manual spreadsheet-driven workflows with scalable, API-driven business processes.
- Owned frontend architecture and refactoring initiatives, developing reusable components and improving code quality, maintainability, and developer experience.
- Integrated third-party and business-critical APIs, including Stripe, while designing web scraping solutions for structured data collection and system integration.
- Developed automation workflows and continuously optimized internal systems through bug fixing, performance improvements, and cross-functional collaboration in a fully remote environment.

Technical Account Manager / GTM Strategist Feb '26 - Present

Inboxly LLC | Palo Alto, US · Remote

- Coordinated onboarding, campaign delivery, and performance tracking for approximately 25 business-to-business software clients, **increasing booked meetings by 20%**
- Build advanced Clay workflows for targeting, enrichment, lead scoring, and personalization using conditional logic, branching, APIs, HTTP requests, and webhooks.

GitHub Actions, CI/CD, Docker, Nginx

Databases: PostgreSQL, MongoDB, MySQL, SQL

Tools & Methods: Git, GitHub, Jira, Postman, VS Code, Agile, Scrum

Cybersecurity: OWASP, Secure Coding, Authentication & Authorization, API Security, Vulnerability Assessment, Security Testing

Salesforce & RevOps: Salesforce CRM, HubSpot CRM, Flows, Reports & Dashboards, Revenue Operations, CRM Automation

- Executed **more than 100 cold email campaigns** using Clay and Email Bison, applying syntax, dynamic variables, and sequencing while maintaining documented projects and accurate campaign data

Junior Engineer

Jan '26 - Feb '26

Heidi Systems | Germany · Remote

- Collaborated with a German-based development team to enhance a Next.js utility monitoring dashboard for apartment-level water and electricity consumption
- Developed Supabase-integrated account workflows and popup forms, expanded chart functionality with user-configurable resizing, and implemented responsive UI/UX improvements from Figma designs
- Built HTML email templates for Make automation workflows and maintained clear pull request documentation while coordinating feature delivery through daily team syncs

Salesforce Developer Candidate

Jul '25 - Dec '25

Project Y | Sandton, SA · Onsite

- Developed Salesforce applications using Apex, SOQL, Visualforce, and Lightning Web Components (LWC) for Account, Lead, and Opportunity management, sales dashboards, and pipeline tracking.
- Built Salesforce data models, custom objects, validation rules, automation, reports, and dashboards to improve data integrity and sales-process visibility.
- Integrated Salesforce with external workflows using Zapier and Google Forms, while applying both declarative and programmatic development to automate processes and deliver end-to-end solutions.

Software Engineer Intern

May '24 - Sep '24

Neutrinos | Randburg, SA · Onsite

- Led end-to-end development of key features for a low-code platform (Neutrinos platform), taking ownership of backend API design (Node.js) and third-party integrations (TensorFlow, AWS, Azure)
- Slashed data retrieval latency by 30% through the conceptualization and implementation of RESTful APIs, seamlessly integrating third-party services like AWS, Azure, Stripe, and Twilio
- Automated CI/CD pipelines using GitHub Actions, leading to a 40% acceleration in deployment frequency

Full-Stack Web Development Candidate

Nov '23 - Apr '24

Afrika Tikkun Services | Randburg, SA · Onsite

- Built dynamic web applications with MongoDB, Express.js, Angular, and Node.js, **increasing feature usage by 30%** through interactive learning dashboards, personalized user profiles, and mobile-responsive interfaces
- Enhanced system performance by 25% through the optimization of database queries and implementation of effective indexing strategies
